AAA Sales & Engineering, Inc Awarded Bronze Certification From Caterpillar

(Oak Creek, WI) – AAA Sales & Engineering, a production machining company and leading manufacturer of railroad products, announced that it was awarded a bronze certification from Caterpillar Inc. As part of its Supplier Quality Excellence Program, (SQEP), the certification recognizes AAA's commitment to providing exceptional service, quality products and delivery performance. The Oak Creek plant supplies Caterpillar with axle and center housings, transmission housings, large torque converter housings and lower drive train components.

Caterpillar's SQEP program involves an intensive review of supplier processes. By working closely with suppliers on process and product improvements, Caterpillar's goal is to drive a zero-defect mentality. One that has been embraced wholeheartedly by AAA.

"We are really excited to be honored by Caterpillar, one of our biggest customers, with this prestigious recognition, said Paul Rook, AAA's Chief Operating Officer and President. All of us here at AAA are committed to providing exceptional products and services to our customers, and providing value from product design through product delivery."

AAA Sales & Engineering, Inc. is an ISO Certified, privately held, family-run manufacturing company that has been doing business since 1968. AAA Sales & Engineering has three separate and distinct operating divisions: Railroad Division; Production Machining Division; and Short Run/Prototype Division.
