AAA Demonstrates M96HY Electro-Hydraulic Retarder

(Chicago, IL) – AAA Sales & Engineering held a demonstration of its M96HY Electro-Hydraulic retarder at the Proviso yard in Chicago, IL for a select group of customers. This high performance self contained hydraulic retarder drew attention as a tremendous advancement over the commonly used E160 model hydraulic retarders currently in place in yards throughout the country.

The M96HY is a low-profile hydraulic counterpart to the proven, industry leading M96 pneumatic retarder employed in a large number of classification yards, and offers a performance increase while also an expected cost savings over other retarder models widely used in the industry today.

AAA Sales & Engineering, Inc. is an ISO Certified, privately held, family-run manufacturing company that has been doing business since 1968. AAA Sales & Engineering offers a number of services from its Railroad and Production Machining Divisions, and serves diverse group of customers throughout North America and beyond.
